expenseme

Inlogik + Xero Integration
Seamless financial connection between ExpenseMe and Xero

Inlogik's new EMS–Xero integration delivers a direct, automated link between ExpenseMe and Xero, helping finance teams eliminate manual data handling, reduce errors, and streamline reconciliation – all in a few clicks.

Modern finance teams need automation, accuracy, and transparency across every workflow. With Inlogik's Xero integration, you can confidently connect your expense management and accounting systems for a faster, smarter month-end close.

Key Benefits

Frictionless Setup - Connect to Xero in minutes with secure OAuth authorization - no IT support required.

End-to-End Automation - Financial codes, expense types, and tax rates sync automatically for seamless ledger alignment.

Smarter Exporting - Post expenses and card transactions directly to Xero as journals or invoices, reducing reconciliation time and manual effort.

Continuous Sync - Daily automatic updates keep financial data current, with manual refresh available anytime for full control.

Feature Highlights

Self-Install Integration:
• Link your Xero account directly from ExpenseMe.
• Seamlessly load all financial segment codes, tax codes, and expense types.
• Link users to Xero contacts for invoice reimbursements

Ongoing Setup & Management:
• Restrict editing of financial types for data integrity.
• Automatic daily sync of financial code data from Xero.
• Manual refresh and export management for flexibility.
• Export data from ExpenseMe to Xero automatically
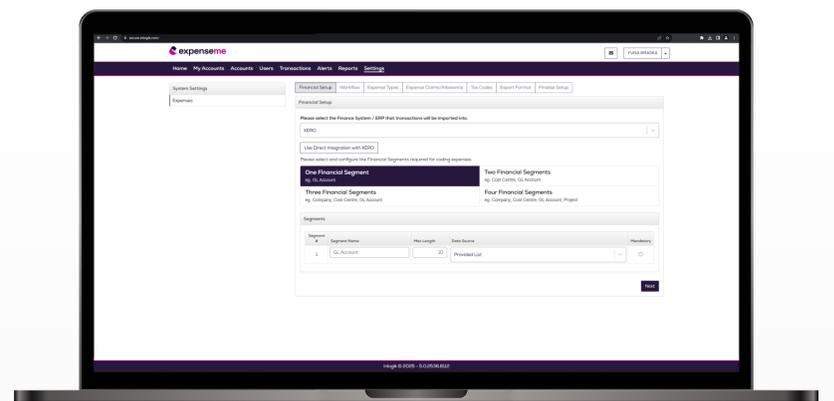

Built for finance teams who value accuracy, automation, and control.
